## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed on 2/18/2004 has been considered.

### ***Claim Rejections - 35 USC § 112***

2. Claim 67-70 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 67 is incomplete because each claim must end with a period. The period "." Is missing.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 41-42 and 67-70 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 33 and 9-11 of U.S. Patent No. 6,753,801. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims recite similar limitations

with colorable differences. For instance, claim 33 of the patent recites "an analog to digital converter and a digital signal path coupled to the converter via a processor" whereas claims the application recites "an analog to digital converter having a digital signal input line (see claim 41) that is coupled to the analog to digital converter via a processor (see claim 42). Colorable differences are also found in claims 67-70 in the application and claims 9-11 of the patent.

***Allowable Subject Matter***
